

Uniweld's New Visible Vapor Charging Device

VAPOR • VUE™

Part# VV1

**CHANGES LIQUID REFRIGERANT TO VAPOR
INCREASE CHARGING RATE
UP TO 8 TIMES**

Vapor-Vue™ is a visible vapor charging device that absorbs heat naturally and flashes the liquid refrigerant from the cylinder and charges into the system as a vapor. Connecting the Vapor-Vue™ to the low side of your charging manifold will increase the charging rate up to 8 times faster and the liquid is controlled by adjusting the manifold valve and monitoring the vapor rate through the double sight glass.

**Vapor-Vue™
is factory
pressure tested**

at 800 psi and can be used to charge any refrigeration and air conditioning systems using R-410A, CFC, HCFC and HFC; Zeotropic and Azeotropic refrigerants without the danger of liquid slugging and damaging the compressor. Placing the manifold and Vapor-Vue™ over hot discharge airflow of the condensing unit will increase the heat exchange and charging rate efficiency. Patent Pending.
